Sailors.—There is no class of citizens which has so many claims upon the benevolence of the community as sailors. They are exposed to the perils and hardships in their regular duties such as landmen cannot even dream of, and which soon wear out the hardiest constitution. They are separated from almost all civil and social ties during the greatest part of their lives and are consequently ignorant of many of the customs of society, of their exposure to knavery while on shore, of their rights, of the value of money, of the excellence of a multitude of principles and observances, the knowledge of which would improve their condition, and the art of taking care of their property or of themselves.
